Max Input 40v

Visit [MetraOnline.com](http://MetraOnline.com) for more detailed information about the product and up-to-date vehicle specific applications.

### COMPONENTS

AXLOC2.2-LD Line Out Converter (LOC)  
Bass Knob

## Universal Premium Active LOC with Line Driver

The Axxess **AX-LOC2.2-LD** is an LOC and line driver all-in-one package. This unit allows you to add aftermarket amplifiers to your factory system easily. High level inputs mean you can tap right into your factory speaker wire for signal, and the built-in signal sensing turns the unit on without the need to find a factory accessory lead. In applications where a low level RCA output needs amplified the built in line driver is exactly what you need to achieve the output you are looking for. It also provides you with a remote turn on output to your amplifier.

### TOOLS RECOMMENDED

- Digital Multi-meter
- Test Tones
