### PRODUCT OVERVIEW

Integrate lighting control into any vehicle with this 6-gang universal switch panel with 3 power levels. It is durable enough for off-road use and has a narrow footprint for easy installation. Users can connect up to 6 different auxiliary LED lights or electrical devices for easy control. This device is designed to be safe for all connected accessories and is compatible with any switches capable of latching to ground. This switch panel has 10 feet of cable for versatile mounting options throughout the vehicle's interior, such as the dash panel, center console, or vehicle pillar.
