What's in the box:

(A) Mounting Hardware, (B) Drill template, (C) 10ft extension cables, (3) Rock lights and Bases

For CHASE rock lights

Add 6 to the pixel count for
each rock light add in series

Mounting:

- With the drill template, mark the (2) outer holes for the screws. Use a 5/32" drill bit to drill these mounting holes.

A) For flat surface mounting, mark the center hole in the drill template for the cable to pass through. Use a 1/2" drill bit to drill the access hole.

B) For curved surfaces (using the curved rubber base) either create an access hole (see option A) or route the cables in the channels on the rear of the base.

- Insert the hex head bolt and tighten the rock light to the vehicle, using a 3mm Allen key and 7mm wrench.
