JP-TSH2 TURN SIGNAL TRIGGER HARNESS

FITS JEEP WRANGLER JK 2007-2018

 **SALES**
386-257-2956

PRODUCT OVERVIEW

Make the installation of aftermarket fender lights, alarms, lights, cameras, blind spot sensors, or other equipment that requires left and right light triggers hassle-free with this convenient harness. It installs between the factory connector and the wires for aftermarket lighting and eliminates the need to cut or splice a stock harness. Both left and right-side harnesses are included and provide triggers for turn signals and the parking light.

- Provides a trigger (turn on) for your parking light, turn signal, and ground
- Harness is easy to install with easy-to-read wire labels
- Fits Jeep JKs without factory LED headlights
- Recommended for use with all Heise LED products to connect triggers
