PRODUCT OVERVIEW

This window-mount 2K DVR from iBEAM is a convenient way to capture potentially vital information related to traffic collisions or other incidents. The 2K video quality ensures that your vehicle's driving history will be recorded with license plates and street signs displayed legibly. This device can help protect drivers from liability in cases where video evidence needs to be presented in a court setting or for insurance purposes. This window-mount DVR plugs into a standard 12V outlet that is universal to most vehicles and can be installed forward or rear-facing. It supports up to a 128GB micro memory card (not included) to provide ample storage capability. Once the memory card is full, this DVR is designed to loop back to the beginning of the feed and start recording over the oldest content. This prevents users from manually deleting their old content to free up space on the memory card. A built-in G-force sensor detects collisions and automatically locks the stored video to prevent recordings from being overwritten once an incident has occurred.

- Plugs into standard 12V outlet for operation
- Can be installed forward or rear-facing
- Built-in G-force sensor detects collisions and automatically locks the stored video to protect recordings
- Video mode or photography mode options
- Maximum size memory card: 128GB, class 10 or higher (not included)*
- Easy Installation: Choose a semi-permanent mount using the included 3M VHB tape or use the included suction cup mount
- Universal applications
- 3-year warranty
