

Changing Radio Type

The **ASWC-1** has the capability to assign (2) functions to a single button except for **Volume Up** and **Volume Down**, after the ASWC-1 has been programmed and is fully functional. This feature can be performed by either following the steps below, through a Windows based computer using the **Axxess Updater**, or through the **Axxess Updater** app available from the Android/Apple mobile devices app store.

Note: Apple mobile devices will require the use of the **AX-HUB** for this feature.

Attention! If more than 20 seconds elapses between steps, the procedure will abort, and the ASWC-1's light will go out. The ASWC-1 may not function properly and may need to be reset and reprogrammed.

1. Turn the key to ignition and wait until the ASWC-1's light flashes **Green** 1 time then goes out.
2. Press and hold the **Volume Down** button on the steering wheel until the ASWC-1's light turns on solid **Red**, then release. The light will then go out indicating that the ASWC-1 is in **Changing Radio Type** mode.
3. Refer to the **Radio Legend** to reference the radio number for the radio being installed.
4. Press and hold the **Volume Up** button on the steering wheel until the ASWC-1's light turns on solid **Red**, then release. Repeat this step for the desired radio number selected.
5. Once the desired radio number has been selected, press and hold the **Volume Down** button on the steering wheel until the ASWC-1's light turns on solid **Red**. The light will remain on solid **Red** for roughly 3 seconds while it stores the new radio information. After the light goes out, test the steering control wheel controls for functionality.

Radio Legend

Radio #	Radio	Radio #	Radio
1	Eclipse (type 1)	10	Clarion (type 2)
2	Kenwood	11	Metra OE
3	Clarion (type 1)	12	Eclipse (type 2)
4	Sony / Dual	13	LG
5	JVC	14	Parrot
