

DL-RGBK1/DL-RGBK2/DL-RGBK3/DL-RGBK4 RGB KITS

 SALES 386-257-2956

PRODUCT OVERVIEW

These kits are great for both consumers and installers. Easy to install and easy to use. All the kits come with a cigarette adaptor and a hardwire cable to power the controller. Both options are plug and play with the controller (use one or the other). The lights and extension cables are also plug and play, so these kits can be installed by a novice without specialty tools or 12V knowledge. The key fob and remote control are RF based so they will work from inside or outside of the vehicle. The frequency used is the same in all of the kits so one remote will control all the kits installed in a vehicle simultaneously. The controller has a music mode with an integrated microphone that will detect the ambient music and pulse the lights accordingly. There are 4 kits that each have been tailored in size, length, and quantity to best fit common requested installations.

All Kits Include:

- Music controller with key fob and card remote
- IP65 LED strips
- Easy installation with all plug and play connections
- Includes cigarette adapter and hardwire power options
- Key fob and remote can be used to control multiple DL-RGBK kits

DL-RGBK1
