HEISE®
LED LIGHTING SYSTEMS

HE-MULB-WA

Instructions

1) Attach mounting brackets to the light using the included hardware.
2) Find suitable location in rear window, and check for clearance before drilling/screwing. Mount light in place using included hardware.
3) Run cable through vehicle avoiding pinch points.
4) Connect power:
   a) Plug power adapter into a 12VDC port.
   b) Hardwire:
      i) Cut off power adapter from cable.
      ii) Connect red wire to a latched switch, +12VDC *(Fuse @10a)*
      iii) Connect black wire to chassis ground
      iv) Connect yellow wire to a momentary switch, +12VDC
         *Hardwire switches sold separately

Operation

Latched Switch: Turns controller on and off. Will resume last flash pattern.

Momentary Switch: Each press of the switch will cycle the light to the next of the 16 patterns.
