1. Disconnect the negative battery terminal to prevent an accidental short circuit.

2. Using the radio removal keys, pull the factory head unit from the dash and disconnect the wiring. Unplug and remove the radio. (Figure A)

3. Pull down on the "cage" from the opening inside on the top and remove. **Note:** *The cage only has 2 sides and a top.* (Figure B)

*Continued to kit assembly.*
DOUBLE DIN/STACKED ISO MOUNT UNITS PROVISION

*Note: Refer also to the instructions included with the aftermarket radio.

1. Attach the Double DIN brackets to the Double DIN/Stacked ISO mount unit(s) using screws supplied with the unit(s). (Figure A)

2. Locate the factory wiring harness in the dash. Use the supplied wire harnesses and make the connections as shown. (Isolate and individually tape off the ends of any unused wires to prevent electrical short circuit) (Figure B)

3. Re-connect the negative battery terminal and test the unit for proper operation.

4. Mount the unit(s) into the radio opening in the sub dash using the (2) black oval head Phillips screws provided. (Figure C)

5. Snap the Double DIN Trim Plate onto the front of the unit(s). (Figure D)
