

### **INTERFACE COMPONENTS**

- AXDI-6524 interface
- LD-AX-XSVI-CH3BT Harness
- 2-pin CAN harness

## APPLICATIONS

## Jeep

Jeeh	
Gladiator*	
Renegade	
Renegade Sport	
Wrangler* JL (Base model)	2018-Up

# Jeep/Ram Select Models Data Interface 2014–Up INTERFACE FEATURES

- Provides accessory power (12-volt 10-amp)
- Retains R.A.P. (Retained Accessory Power)
- Provides wires for multimedia radios (park brake, reverse, speed sense)
- Pre-wired AXSWC harness (AXSWC sold separately)
- Retains the factory backup camera (Not retained on Wrangler JL or Gladiator)
- Retains balance and fade
- Retains the factory AUX-IN jack
- Designed for amplified and non-amplified systems
- Allows retention and adjustment of the Personalization Options
- Adjust Personalization Options through a wireless application
- Smartphone application offering full control from either Android or Apple mobile devices
- Micro-B USB updatable

#### Ram

Promaster (w/color screen)	2014-Up	
Promaster City	2015-Up	

\* Factory Backup Camera will not be retained on Wrangler JL or Gladiator

## **CONNECTIONS: LD-AX-XSVI-CH3BT DIAGRAM**

## CONNECTIONS (CONT.)

## INSTALLATION

CAN connections to the vehicle: (See page 2 for Diagram)

- Disconnect the 2-pin connector from the AXDI-6524 harness.
- Connect the 2-pin CAN harness to the AXDI-6524 harness.
- Route the harness to the vehicles OBD port located under the driver's side dash.

#### Option 1 (excluding Wrangler)

- Connect the White/Red wire to the CAN-HI wire. (Figure A)
- Connect the White/Green wire to the CAN-LO wire. (Figure A)

#### 12-pin pre-wired AXSWC harness:

This harness is to be used along with the **AXSWC** (sold separately) to retain steering wheel audio controls. If the **AXSWC** is not being used, disregard this harness. If it is to be used, please refer to the AXSWC instructions for radio connections and programming. Disregard the harness that comes with the **AXSWC**.

#### With the key in the off position:

- 1. Connect the **AXDI-6524 harness** to the **AXDI-6524 interface**, and then to the wiring harness in the vehicle.
- 2. If an **AXSWC** (sold separately) will be used, do not connect it until the **AXDI-6524** is programmed and fully functional.

## PROGRAMMING

**Attention!** If the interface ever loses power, the following steps will need to be performed again. Please ensure that the owner of the vehicle knows this.

**1.** Turn the key (or push-to-start button) to the ignition position and wait until the radio comes on.

**Note:** If the radio doesn't not come on within 60 seconds, turn the key to the off position, disconnect the interface, check all connections, reconnect the interface, and then try again.

- 2. Turn the key (or push-to-start button) to the off position, then open and close the driver's door.
- **3.** Wait 5 minutes for the vehicle to fully go to sleep.
- 4. Start the vehicle, then test all functions of the installation for proper operation.

## **APP INSTRUCTIONS**

- 1. Download and install the AX-CUSTOM-BT app from the Android/Apple mobile devices app store.
- 2. Start the vehicle.
- 3. Open the app and wait for the Customization Settings menu to appear. If Not Connected appears instead, first press the <u>right</u> button in the top right corner of the screen, then press the <u>left</u> button. This will take you back to Customization Settings. The pairing process will begin at this point.
- **4.** Once paired, **Settings** will be displayed in the screen. From this point on you can make changes to the vehicle as desired, as the long as the vehicle is running . (Figure A)

**Note:** Screenshot shown for illustration only. Actual options available vary per vehicle and per trim.

**Note:** The app must be paired with the interface at least once for the initial setup. Failure to do so will prevent the interface from functioning.

(Figure A)

## **APP INSTRUCTIONS (CONT.)**

## **Other Options**

Manage Vehicles (Figure B)

- Select **Manage Vehicles** by pressing the button in the top right of the screen.
- Pressing either the **Add Vehicle** or **Edit** (pencil icon) button will open the **Configure Vehicle** menu.

Configure Vehicle (Figure C)

- The name of the vehicle can be changed by pressing the text field.
- The app can automatically detect the interface in the vehicle by pressing the **Search** button (magnifying glass).
- The **Make** and **Model** fields will open a drop down list for the user to select the make and model of the vehicle that the interface is installed in.
- Press the Save button to store the changes.
