

LOC T-Harnesses have vehicle specific applications. Please visit <https://axxessinterfaces.com/> for the latest and up-to-date application information.

### Things to know

---

Active noise cancellation is an OE module that helps reduce unwanted background noise. Microphones mounted throughout the vehicles are used to monitor sound levels and frequencies inside the vehicle's cabin. The factory ANC generates an inverted signal from the factory speakers to cancel out unwanted cabin noise.

It is recommended that the RPO code is double check to confirm application. The RPO Codes can be found on a placard labeled "Service Parts Identification" in the glove box, on the trunk floor or inside the driver's door panel.

The **Premium II** Sound System is enhanced with a 12-channel amplifier (2) and boasts an impressive setup consisting of 17 speakers.

The 4-channel amplifier is designed with two built-in connector receptacles and will use ANC-CHH1, while the 12-channel amplifier features three integral connector receptacles and will use the ANC-CHH2.

Year Range	Make	Model	Qualifier	Location
2018.5-2023	Jeep	Wrangler JL	Premium Audio 8 or 12 Speaker	Left End of Dash
2019-2023	RAM	1500	Premium Audio RFU Premium Plus audio RFA/RFL	Under Drivers seat
2019-2023	RAM	2500	Premium Audio RFU Premium Plus audio RFA/RFL	Left End of Dash
2019-2023	RAM	3500	Premium Audio RFU Premium Plus audio RFA/RFL	Left End of Dash

ANC MODULE VARIANT	Number of Channels	Load Impedance	ANC Part number
ANC Module– Base	4	4	ANC-CHH1
ANC Module– Premium	4	2	ANC-CHH1
Integrated Amp/ANC	8 or 12	2	<b>ANC-CHH2</b>

## Bypassing ANC

In some amplified vehicles the ANC module is inside the factory amplifier(s).
